Non-Spray Coated

OE Approved

ES3

TECHNOLOGY

Introducing ES3, the latest instalment to our Eco Shield range. The ES3 comes in a full range of sizes to accommodate for all types of commercial vehicles, making it a perfect, more affordable alternative to the ALCOA DURA-BRIGHT. Through extensive lab testing, our wheels are now able to withstand 1,200 hours of salt spray, ensuring our easy-clean finish keeps your wheels shining, no matter what the weather throws at your vehicles.
