WIDE SMOOTH PROFILE

- Provides low vibrations (comfort) and prevents lug tearing on the steer axles on abrasive surfaces

WIDE SIDEWALL WITH RIM GUARD

- Provides best side impact resistance
- Three times thicker than our standard tires

MASSIVE TREAD BLOCKS AND DEEP LUGS

- Extend service life in severe applications

Remarks

(1) Check rim for size, especially on width, as this should correspond to tirebase marking. Check also max. load of rim with rim manufacturer, as wheel load will be restricted by lowest load capacity, either the one given by the rim or by the tire.
